Barracuda XDR Network Security

Comprehensive protection for your customers’ networks

84% of organizations have been breached as a direct result of a network attack in the past 12 months according to recent research. Protect your customers with Barracuda XDR Network Security which is supported by a 24/7 Security Operations Center (SOC).

Simplify network security service delivery

Monitor your firewalls and network devices for malicious activity and detect intrusions on your network. Suspected threats are correlated with telemetry from other data sources and analyzed by Barracuda XDR Network Security and our team of experts 24/7.

Gain security expertise

Instantly augment your internal security resources with a team of tenured security experts who work in the background to provide a 24/7, proactive detection and response service for all your managed customers. All identified incidents are triaged, and you are alerted and guided toward a resolution.

Enhance your network security by adding Barracuda Intrusion Detection Systems (IDS):

Barracuda IDS - Delivers best-in-class intrusion detection with hundreds of detection rules. It analyzes network traffic to detect Indicators of Compromises (IoCs). The Barracuda SOC manages the IDS to maximize network security for your customers.

Part of the Barracuda XDR suite:

XDR - Proactive cybersecurity-as-a-service platform backed by teams of tenured security experts in a 24/7 Security Operations Center (SOC) built for MSPs.

XDR Endpoint Security - Efficiently and effectively detect and respond to advanced threats such as zero-day attacks, ransomware, and more.

XDR Email Security - Proactively monitors existing email security solutions to enhance protection against spear phishing, business email compromise (BEC), and more.

XDR Cloud Security - Secures your customers’ cloud environments from unauthorized access to cloud mailboxes, admin changes, impossible logins, and brute force attacks.

XDR Network Security - Detects potential threat activity on your customers’ networks, such as command-and-control connections, denial-of-service attacks, data exfiltration, and reconnaissance.

XDR Server Security - Protects your customers’ systems from sophisticated attacks such as password sprays, brute force attacks, and privilege escalation.

Cyber Warranty - Provides financial protection that puts you and your clients’ needs first. The Barracuda XDR suite streamlines the warranty application and claim process, speeding the process from months to days.

Key features:

- Threat intelligence includes billions of IoCs
- Understands attack tactics and predicts their next steps via detection rule mapping with MITRE ATT&CK® framework
- Correlates telemetry from multiple sources with your existing security tools to provide greater visibility.
- Provides visibility of threat activity in XDR's multi-tenant dashboard
- Leverages SIEM and SOAR technologies
- Supports Custom alerting and self-service reports
- Includes 24/7/365 SOC support and remediation guidance
- Backs critical security controls within industry standards and compliance frameworks such as continuous monitoring and log retention

Key integrations:

- Barracuda CloudGen Firewall
- Barracuda SecureEdge
- Check Point FireWall-1
- Cisco Adaptive Security Appliance (ASA)
- Cisco Meraki
- Cisco Umbrella
- Citrix Netscaler
- Juniper XDR Series
- Juniper Secure Services Gateway
- Fortinet FortiGate Firewall
- Palo Alto Firewall
- SonicWALL Firewall
- Sophos UG
- Sophos XG
- WatchGuard Firebox Firewall
- And many more
